DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 17-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The "system" as claimed lacks evidence of storage on a medium which enables any underlying functionality to occur. The elements listed in the claims (encoder and decoder) are not necessarily hardware elements. Instead, one can reasonably interpret them as software. Software, per se, is non-statutory. See M.P.E.P. 2601.1 Section I, which states, "Since a computer program is merely a set of instructions capable of being executed by a computer, the computer program itself is not a process and USPTO personnel should treat a claim for a computer program, without the computer-readable medium needed to realize the computer program's functionality, as nonstatutory functional descriptive material."

Allowable Subject Matter

Claims 1-16 are allowed in view of the decision by the Board of Patent Appeals and Interferences dated September 8, 2008.

Art Unit: 2443
